Editor-in-Chief
The Journal of Trauma and Acute Care Surgery

It is a great honor to write this editorial for the Trauma Focused Issue of the Kosova Journal of Surgery.

This issue of the Journal is mandatory reading for all those who participate in any way in the management of severely injured patients.

The editor compiled a series of mini-reviews addressing the most relevant topics in trauma care today. If this were not done for a scientific journal, could be a compendium of trauma surgery, a manual, or a textbook.

The authors are recognized worldwide as authorities in trauma care and are leaders in their countries and communities. The topics are relevant to trauma surgeons, as they address issues that we all deal with on a daily basis in civilian trauma centers and in military operations around the world.

Focused issues such as this one bring the "trauma world" together, consolidating the idea that we can and should work together to share our experiences, opinions, and points of view, as trauma is a global disease that does not spare anyone based on sex, ethnicity, religion, citizenship, or socio-economic status and kills or causes disabilities that have an impressive and unsustainable impact in modern societies.

I congratulate the Journal leadership for this initiative and the generosity of the authors for writing excellent manuscripts for the Trauma Focused Issue.

Enjoy the reading!!!
